Uniframe

ALUMINIUM WINDOW SYSTEMS

About Us

Uniframe specializes in the designing and manufacturing of high-quality aluminium windows. We deliver cutting-edge solutions that combine aesthetics with functionality, catering to both residential and commercial needs. Our focus on precision engineering and exceptional customer service makes us a trusted name in the industry.

How to find the best option for you?

Looking for a window and door material that can withstand harsh weather conditions?

Would you prefer windows and doors with aluminum that has been tested to meet international standards for quality and performance?

Do you want windows and doors with child safety locks, limited opening mechanism, and robust stainless steel meshes?

Would you prefer your sliders to have a panoramic view with upgraded features that look sleek and modern?

Would you like the option to customize the colour and finish of your window and door frames?

Is it essential that the hardware on your windows and doors complements the overall design, offering both functionality and aesthetics?

Are you interested in windows and doors with smooth, easy-to-operate handles and mechanisms that won't wear out over time?

Do you think that window and door lock quality matters, and do you think that multi-point locking systems provide better safety and security?

Is enhanced security important to you without compromising the aesthetics?

Are you looking for hardware that provides a tight seal to improve energy efficiency and weather resistance?

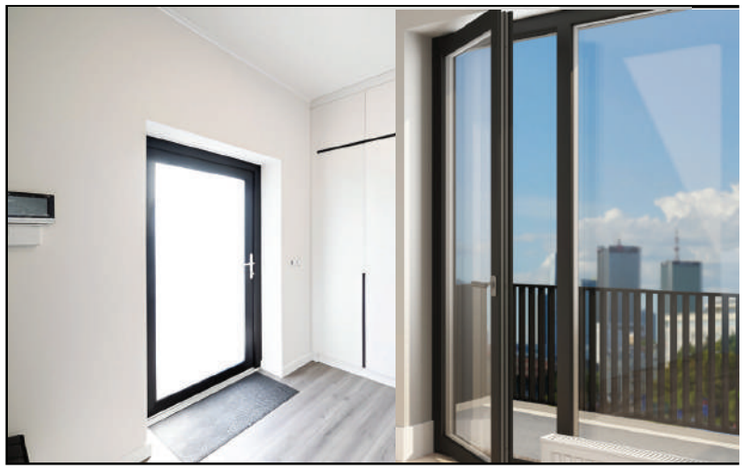

Is professional installation important to you to ensure the longevity and performance of your windows?

How does having easy access to our Pan India call center enhance your experience with our after-sales support?

"How?

"Let's work together to find the perfect solution for you."

Why Uniframe Doors and Windows?

Durability:

Our Aluminium windows are highly durable. Our **Powder Coating Technology** makes our windows **corrosion free** for upto **25 years.**

Energy Efficiency:

With the help of our **gaskets** and **excellent sealing methods,** our products become highly leak-proof and energy-efficient.

Strength:

Engineered for strength with minimum material thickness of **1.6mm** and strong **Dual Cleat corners,** we make our products structurally robust.

Aesthetic appeal:

They provide a **sleek, slim,** and **modern look**, easily customizable with various finishes and colors to perfectly complement any architectural style.

Low Maintenance:

Aluminium resists warping, cracking, swelling, and corrosion, making it low-maintenance. Combined with our **tested hardware** and **quality gaskets**, it offers lasting durability.

Security:

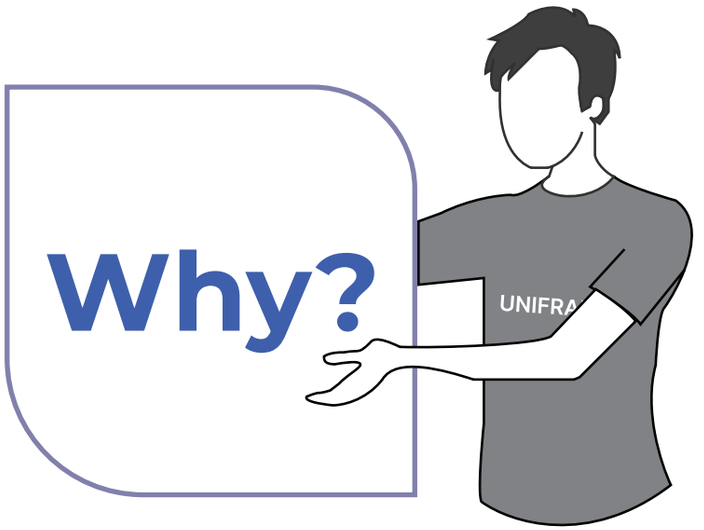

Apart from our robust structure, our **multi-point locking mechanism** and **anti-theft mechanism** provides extra security to your space.

Eco-Friendly:

Aluminium is a **100% recyclable material,** making it an environmentally friendly choice for eco-conscious consumers.

Versatility :

Our Aluminium products can be tailored to **various styles** and **sizes**, offering **flexibility in design** and installation for both residential and commercial projects.

High-quality extrusion and powder coating ensure strong, durable, and visually appealing aluminium products. Aluminium **6063-T6** is ideal for its strength and corrosion resistance, making it perfect for long-lasting, attractive windows.

Premium Materials, Perfect Performance

Our manufacturing process for aluminium windows and doors systems begins with procurement of **high quality raw materials from across the globe.** These materials are then precisely cut, shaped, and assembled together using advanced machinery to meet specific design requirements. The frames undergo rigorous quality control checks to ensure structural integrity and durability.

After shaping, the aluminium frames are treated for corrosion resistance and finished with a **high-quality powder coating** to enhance appearance and **Longevity to upto 25 years.** The glass panels are carefully fitted and sealed within the frames to provide **optimal sound insulation, Thermal resistance and overall performance.**

Finally, each window undergoes a **thorough rigorous tests and inspection** to guarantee it meets our stringent quality standards before being packaged and shipped to customers.

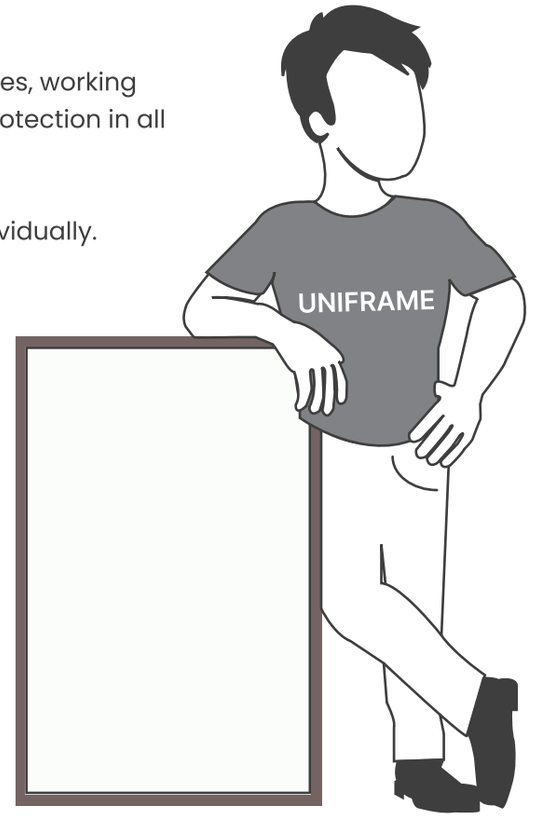

Meet Our Heroes Individually

Every component within our products plays a heroic role in serving you.

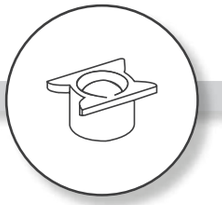

They support each other with their unique abilities, working together as a system to provide comfort and protection in all conditions, whether light or extreme.

So, let's meet some of these unsung heroes individually.

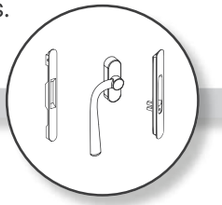

About Our Engineered Heroes

Ball Non-Return Valve
Blocks wind and insects from coming in and, lets collected water flow out.

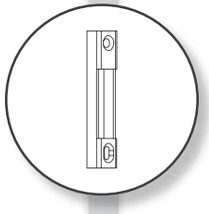

Handles/ Locks
Robust quality security with single/ multi-point locking systems.

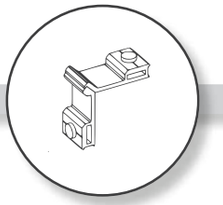

Corner Alignment
Aligns frame, supports corners, boosts stability, and strength.

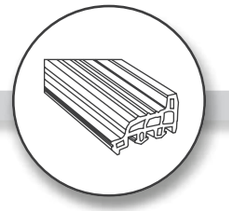

Locking Receiver
Ensures Security and Peace of Mind.

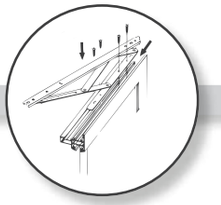

Corner Cleats
Enhances the overall durability and structural integrity.

Our each component does the best job to provide the best and quality experience.

Gaskets
Seals tightly, keeping the outer environment out.

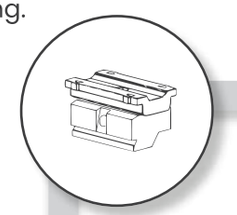

Easy Clean Friction Stay

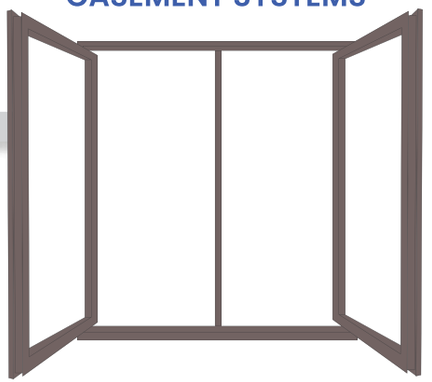

Smooth and effortless operation.

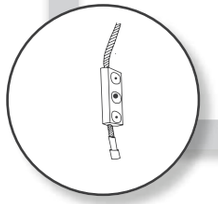

Frame and Sash Raiser

Exact fit, Stable grip to avoid overtime sagging.

CASEMENT SYSTEMS

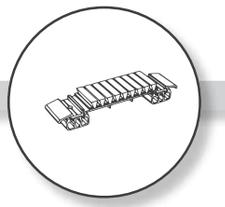

Safety Catch

Secures the sash to prevent accidental falls if loose.

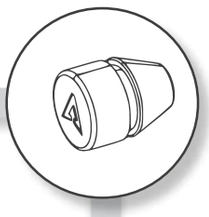

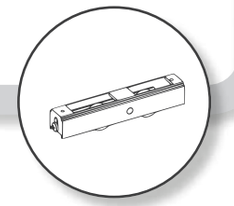

Center Seal

Prevents air entry and clears dust from rollers.

Shock Absorber

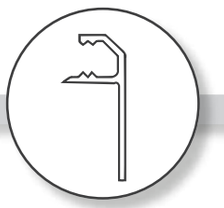

Absorbs shocks, providing a cushioned effect.

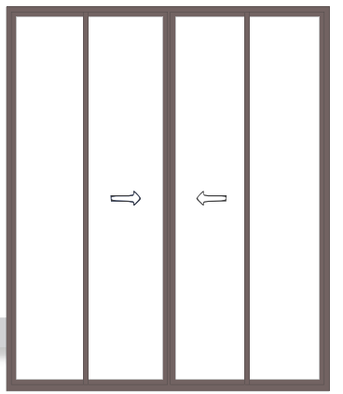

Rain Cover Cap Profile

Sleek shield against rain and storm.

SLIDING SYSTEMS

Rollers

Effortless sliding with our precision-engineered rollers.

Graf 26 Sliding Window

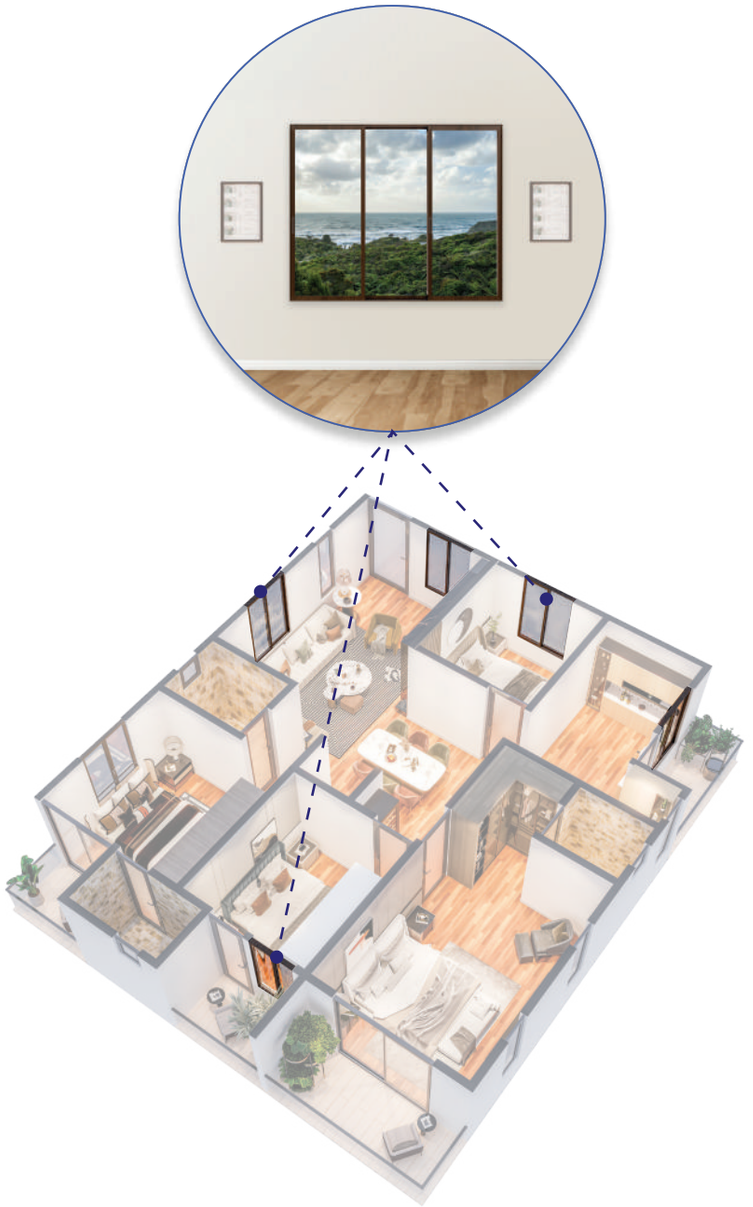

Product Specifications

- Frame Face Width: **44mm**
- Frame Depth : **48mm, 74mm, 84mm**
- Sash Face Width: **53mm**
- Sash Depth: **26mm**
- Wall Thickness: **Min 1.2mm**
- Glass Thickness: **5mm to 8mm**
- Interlock Face width: **32mm**

- Hardware : **Aluminium/Stainless steel**
- Locking System: **Single**

- Wind Load Resistance: **Designed for 1500 pa**
- Air Permeability: **Designed for 300 pa**
- Water Tightness: **Designed for 200 pa**

- Sash Size Minimum **600mm (H) X 500mm (W)**
- Sash Size Maximum **1500mm (H) X 800mm (W)**
- Max per sash weight: **30 Kg**
- Concealed: **No**

Graf 26 Sliding Door

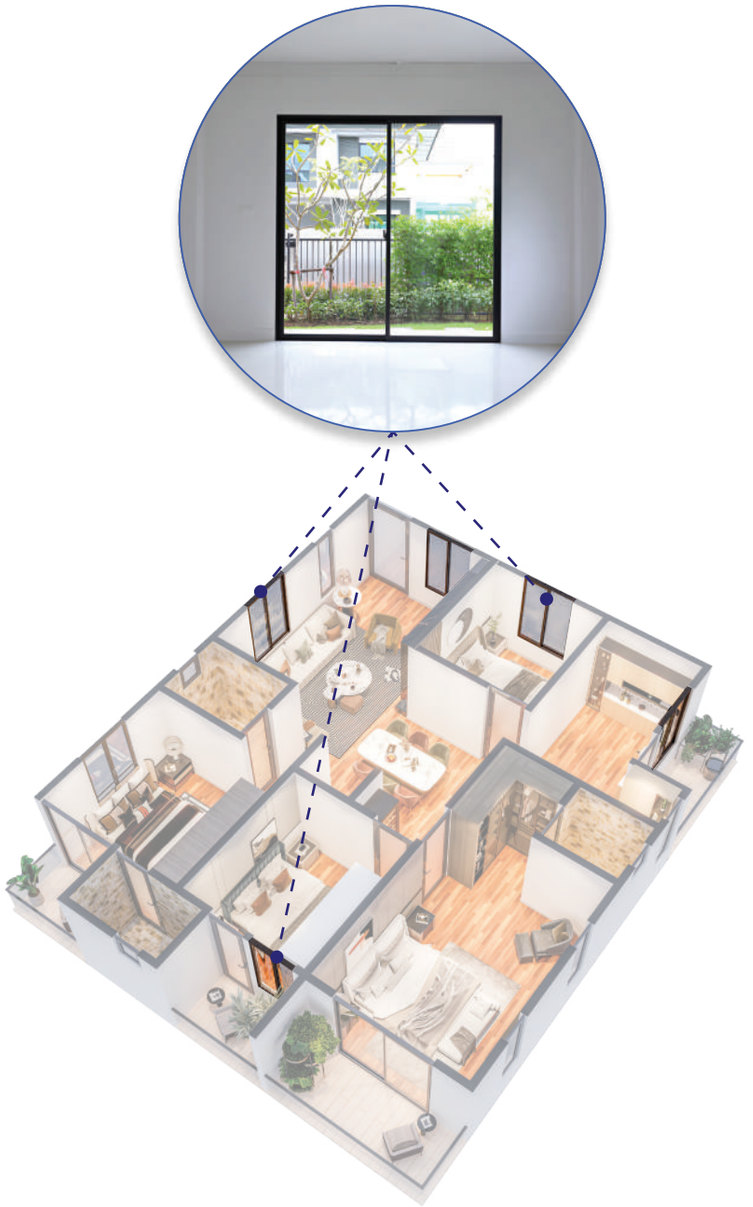

Product Specifications

- Frame Face Width: **44mm**
- Frame Depth : **48mm, 74mm, 84mm**
- Sash Face Width: **63mm**
- Sash Depth: **26mm**
- Wall Thickness: **Min 1.2mm**
- Glass Thickness: **5mm to 8mm**
- Interlock Face width: **32mm**

- Hardware : **Aluminium/Stainless steel**
- Locking System: **Multipoint Locking system**

- Wind Load Resistance: **Designed for 1500 pa**
- Air Permeability: **Designed for 300 pa**
- Water Tightness: **Designed for 200 pa**

- Sash Size Minimum **600mm (H) X 500mm (W)**
- Sash Size Maximum **2100mm (H) X 1000mm (W)**
- Max per sash weight: **50Kg**
- Concealed: **No**

Graf 32 Sliding Window

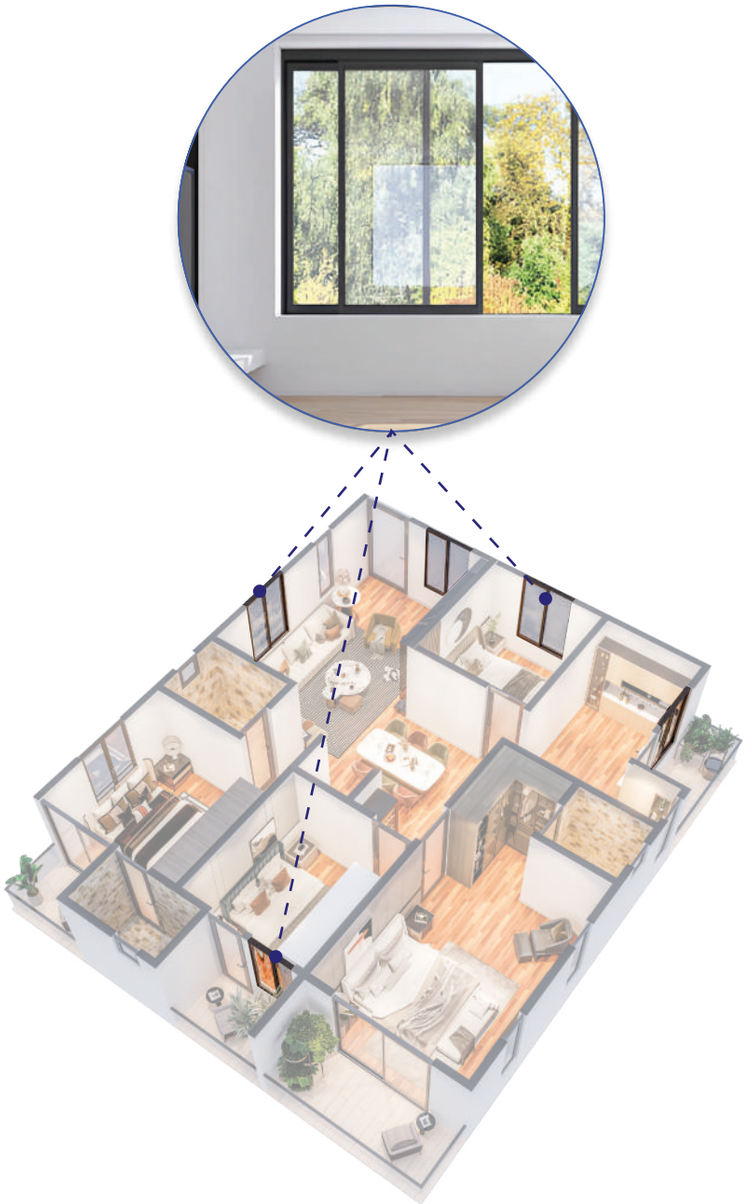

Product Specifications

- Frame Face Width: **44mm**
- Frame Depth : **83.5mm, 131mm**
- Sash Face Width: **55mm**
- Sash Depth: **32mm**
- Wall Thickness: **Min 1.6mm**
- Glass Thickness: **5mm to 24 mm**
- Interlock Face width: **20mm**

- Hardware : **Aluminium/Stainless steel**
- Locking System: **Single/ Multipoint Locking system**

- Wind Load Resistance: **Tested for 5500 pa**
- Air Permeability: **Tested for 600 pa**
- Water Tightness: **Tested for 300 pa**

- Sash Size Minimum **650mm (H) X 500mm (W)**
- Sash Size Maximum **1800mm (H) X 1200mm (W)**
- Max per sash weight: **80 Kg**
- Concealed: **Yes(Inside)**

Graf 32 Sliding Door

Product Specifications

- Frame Face Width: **44mm**
- Frame Depth : **83.5mm, 131mm**
- Sash Face Width: **65mm**
- Sash Depth: **32mm**
- Wall Thickness: **Min 1.6mm**
- Glass Thickness: **5mm to 24 mm**
- Interlock Face width: **20mm**

- Hardware : **Aluminium/Stainless steel**
- Locking System: **Multipoint Locking system**

- Wind Load Resistance: **Tested for 5500 pa**
- Air Permeability: **Tested for 600 pa**
- Water Tightness: **Tested for 300 pa**

- Sash Size Minimum **1200mm (H) X 800mm (W)**
- Sash Size Maximum **3000mm (H) X 1200mm (W)**
- Max per sash weight: **110 Kg**
- Concealed: **Yes(Inside)**

Graf 45 Sliding Door

Product Specifications

- Frame Face Width: **25mm**
- Frame Depth : **132mm, 195mm**
- Sash Face Width: **85mm**
- Sash Depth: **45mm**
- Wall Thickness: **Min 1.6mm**
- Glass Thickness: **8mm to 32mm**
- Interlock Face width: **20mm**

- Hardware : **Aluminium/Stainless steel**
- Locking System: **Multipoint Locking system**

- Wind Load Resistance: **Designed for 2000 pa**
- Air Permeability: **Designed for 300 pa**
- Water Tightness: **Designed for 200 pa**

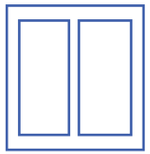

- Sash Size Minimum **2400mm (H) X 1200mm (W)**
- Sash Size Maximum **4200mm (H) X 1800mm (W)**
- Max per sash weight: **400 Kg**
- Concealed: **Yes**

Livio Minimal Casement Window

Product Specifications

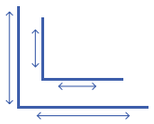

- Frame Face Width: **54mm**
- Frame Depth : **67mm**
- Sash Face Width: **52mm**
- Sash Depth: **68mm**
- Wall Thickness: **Min 1.5mm**
- Glass Thickness: **5mm to 24mm**

- Hardware : **Aluminium/Stainless steel**
- Locking System: **Multipoint Locking system**

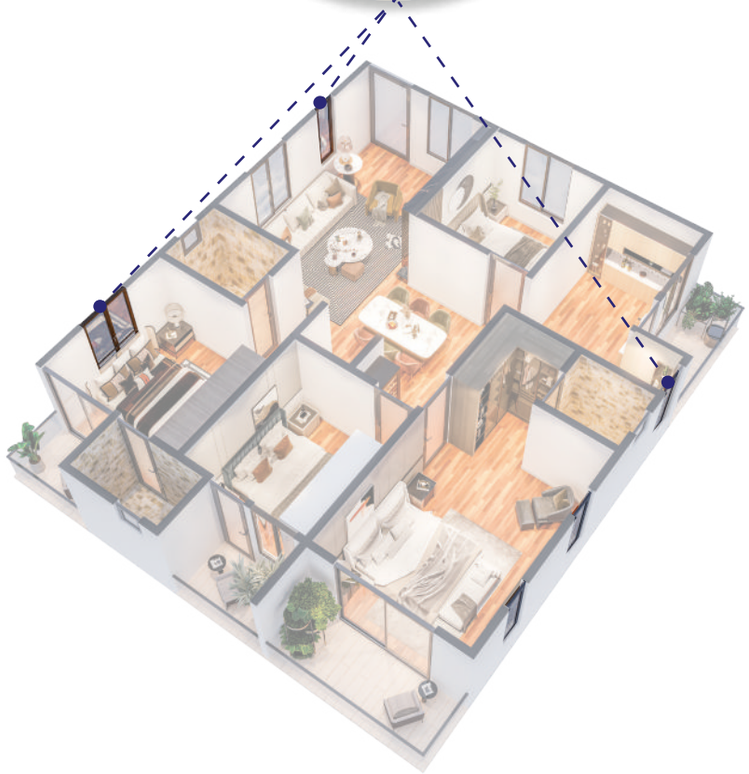

- Wind Load Resistance: **Designed for 2000 pa**
- Air Permeability: **Designed for 600 pa**
- Water Tightness: **Designed for 450 pa**

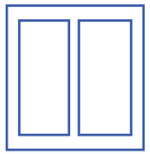

- Sash Size Minimum **600mm (H) X 600mm (W)**
- Sash Size Maximum **1800mm (H) X 800mm (W)**
- Max per sash weight: **60 Kg**
- Concealed: **Yes(Inside)**

Robus 40 Casement Window

Product Specifications

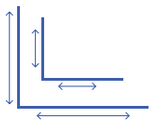

- Frame Face Width: **48.5mm**
- Frame Depth : **40mm**
- Sash Face Width: **84mm, 70.5mm**
- Sash Depth: **48mm**
- Wall Thickness: **1.5mm**
- Glass Thickness: **5mm to 28mm**

- Hardware : **Aluminium/Stainless steel**
- Locking System: **Multipoint Locking system**

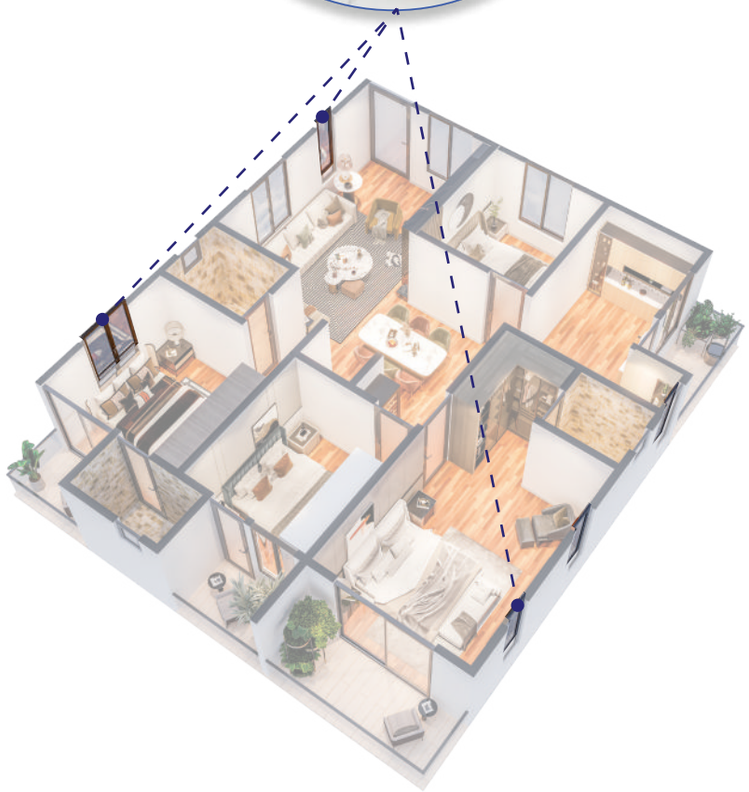

- Wind Load Resistance: **Designed for 2000 pa**
- Air Permeability: **Designed for 600 pa**
- Water Tightness: **Designed for 450 pa**

- Sash Size Minimum **600mm (H) X 600mm (W)**
- Sash Size Maximum **1800mm (H) X 800mm (W)**
- Max per sash weight: **60 Kg**
- Concealed: **Yes**

Robus 40 Casement Door

Product Specifications

- Frame Face Width: **65mm**
- Frame Depth : **40mm**
- Sash Face Width: **96mm**
- Sash Depth: **48mm**
- Wall Thickness: **Min 1.6mm**
- Glass Thickness: **5mm to 28 mm**

- Hardware : **Aluminium/Stainless steel**
- Locking System: **Multipoint Locking system**

- Wind Load Resistance: **Designed for 2000 pa**
- Air Permeability: **Designed for 600 pa**
- Water Tightness: **Designed for 450 pa**

- Sash Size Minimum **1800mm (H) X 750mm (W)**
- Sash Size Maximum **2400mm (H) X 950mm (W)**
- Max per sash weight: **110 Kg**
- Concealed: **No**

Robus 40 Fold and slide

Product Specifications

- Frame Face Width: **65mm**
- Frame Depth : **40mm**
- Sash Face Width: **96mm**
- Sash Depth: **48mm**
- Wall Thickness: **Min 1.5mm**
- Glass Thickness: **6 mm to 28 mm**

- Hardware : **Aluminium/Stainless steel**
- Locking System: **Multipoint Locking system**

- Wind Load Resistance: **Designed for 2000 pa**
- Air Permeability: **Designed for 600 pa**
- Water Tightness: **Designed for 300 pa**

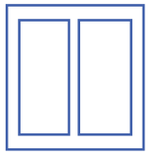

- Sash Size Minimum: **1800 (H) X 600mm (W)**
- Sash Size Maximum: **2700mm (H) X 900mm (W)**
- Max per sash weight: **80 Kg**
- Concealed: **Yes both inside and Outside**

Facade and Sky Lights

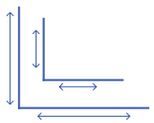

Product Specifications

- Frame Face Width: **55mm**
- Frame Depth : **55mm & 110mm**
- Wall Thickness: **2mm**
- Glass Thickness: **up to 12mm**

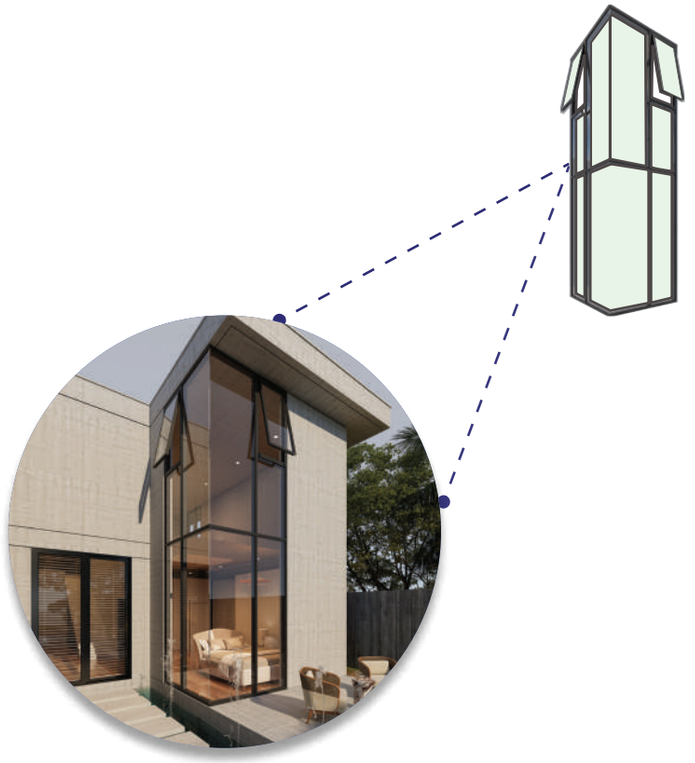

- Wind Load Resistance: **Designed for 2000 pa**

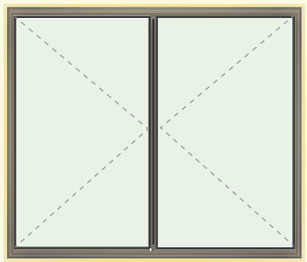

- Sash Size Minimum: **1 m²**
- Sash Size Maximum: **36 m²**

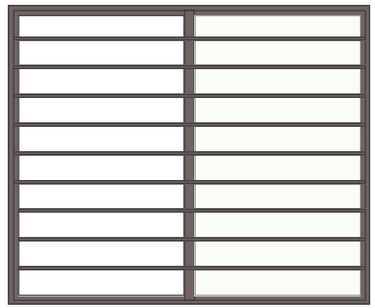

Elevate with Integrated Premium Add Ons

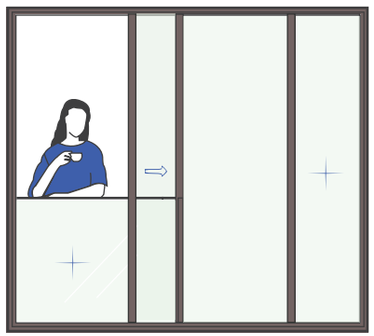

Architrave/ Architrave with LED Lights

Enhance your windows with stylish architraves that protect against damage and water seepage while preserving aesthetic appeal. Customize your doors and windows with LED add-ons to match your taste and needs.

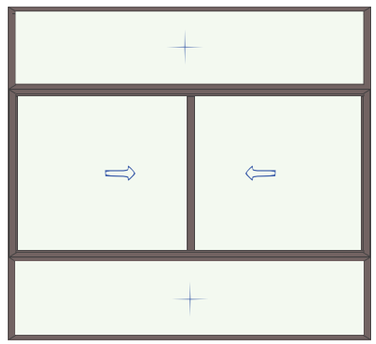

Add -on Grills

Looking for extra protection without sacrificing aesthetics? Our add-on grills provide enhanced security with unique anchoring points while maintaining a seamless, stylish look for your space.

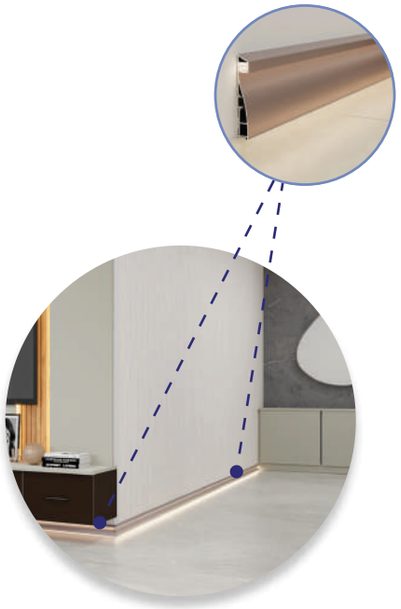

Integrated Hand-Rail

Glass handrails are crucial for modern design, offering both safety and a high level of aesthetic appeal. Proper design and rigorous testing ensure they meet safety standards while enhancing the visual and spatial qualities of a building.

Coupler

Coupler profiles in aluminum windows enable seamless connections, offering design flexibility and structural stability. They support custom shapes and larger window units while maintaining a cohesive, aesthetic look.

Aluminium Skirting

The wall skirting profile provides a modern, sleek alternative to traditional stone or tile skirtings. It improves hygiene and aesthetics by protecting walls from water and dirt, with optional lighting for added functions and style.

- Skirting Height: **81 mm.**
- Material : **Aluminium.**
- Finish options: **Multiple colors and textures (anodized, Powder-coated, brushed etc.**
- Illuminations: **Integrated LED light.**
- Mounting: **Surface mount with concealed fixings.**
- Top Edge profile: **Curved or beveled for easy cleaning.**

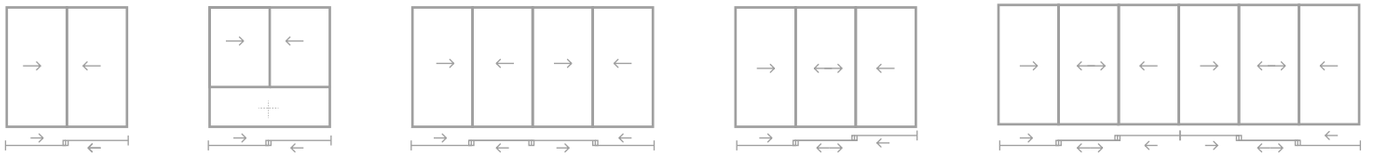

Aluminium Shrouds

The aluminum shroud system offers effective sun shading, reduces glare and heat gain, enhances privacy, and features perimeter lighting that highlights architecture, combining elegance, efficiency, and modern aesthetics without bulky projections.

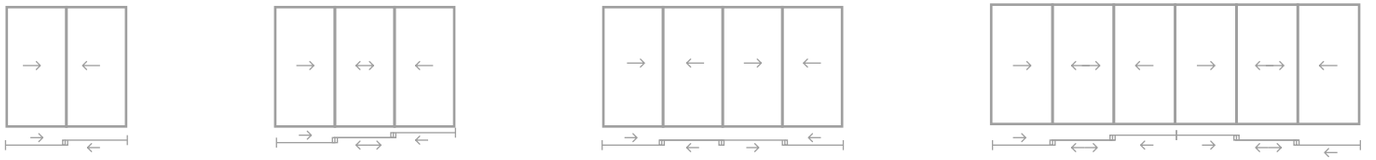

- Material: **Aluminium Alloy (6063-T6)**
- Shroud Depth : **300mm**
- Wall thickness: **2.5 mm**
- Wind load resistance: **Designed to withstand 4kPa**
- Hardware materials: **Zamac and stainless steel**
- Illuminations: **Integrated inner perimeter LED lighting.**
- Maximum size: **Customized to match window profiles.**

“Built Like a Vault”

We meticulously test every product and its components at multiple stages to ensure the highest quality. These rigorous evaluations guarantee that each product we offer meets strict **safety standards,** delivers exceptional **performance,** and enhances overall efficiency and **durability**. Regular testing and certification confirm that our doors and windows can withstand real-world conditions and maintain their functionality over time.

Surface Coating Thickness

Corrosion Resistance

Protects against moisture, salt, and pollutants; extends lifespan and reduces maintenance.

Durability and Wear Resistant

To test surface durability, resisting wear, scratches, and impacts to maintain appearance and functionality.

Aesthetic Quality

Provides a high-quality finish that resists fading, discoloration, and everyday wear and tear.

Thermal Performance

Testing the coating thickness to ensure resistance to temperature fluctuations and maintain durability.

Hardware Durability Test

Mechanical Endurance

Tested aluminum hardware under repeated use *(up to 10,000 to 1,00,000 cycles)* to ensure reliable, smooth operation of hinges, locks, and handles, minimizing failure risk.

Environmental Durability

We evaluate hardware resistance to environmental factors like moisture, UV, temperature extremes, and corrosion to ensure durability and minimize maintenance.

Structural Integrity

Assess hardware’s structural strength under various loads to ensure it supports doors, windows, or components without warping, ensuring safety and durability.

Aesthetic Longevity

Test resistance to scratches, discoloration, and wear to maintain visual appeal and reduce the need for replacements or repairs.

Overall Product Performance Testing

Air Tightness

Measuring product's ability to prevent air leakage, ensuring consistent indoor temperatures, energy efficiency, and draft prevention for a comfortable environment.

Water Tightness

Test the product’s resistance to water infiltration to prevent moisture damage, mold growth, and interior deterioration, ensuring performance in all weather conditions.

Structural Rigidity

Assessing every component’s impact on the product's structural integrity to ensure it withstands high wind loads, such as those experienced during hurricanes.

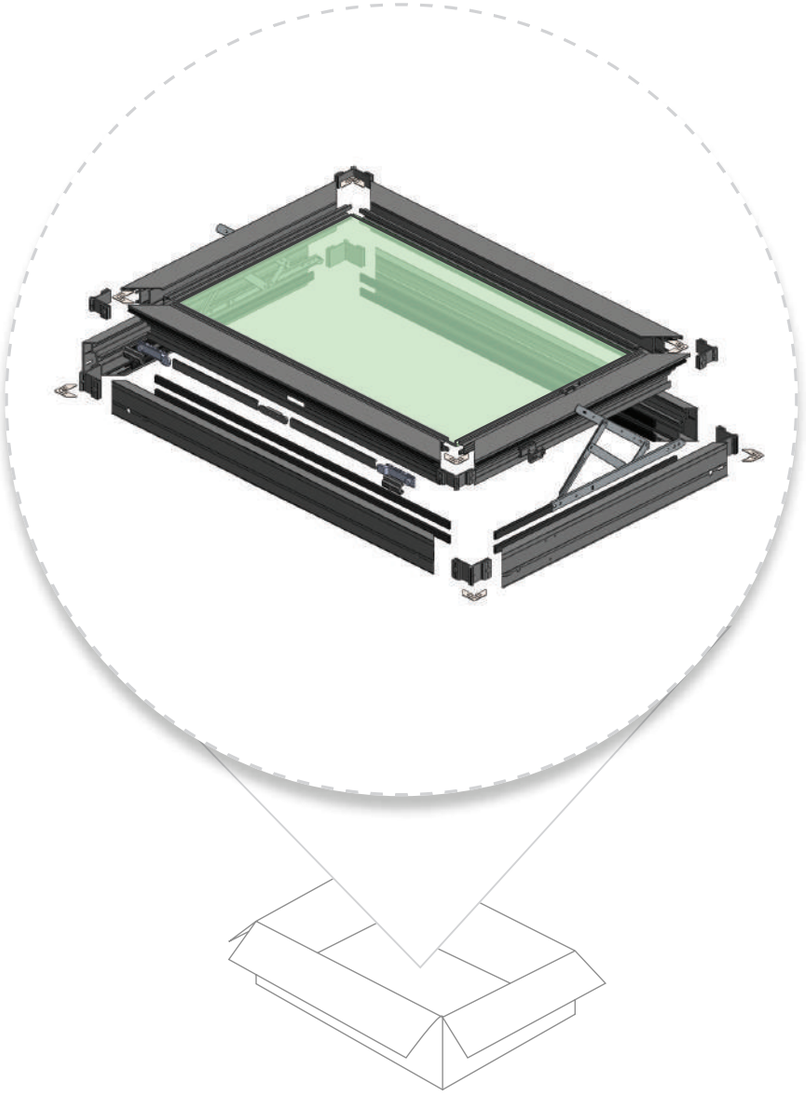

User Experience (Smoothness)

Ensuring the product supports smooth operations, reducing friction and wear to enhance ease of use and overall user experience.

Acoustic Performance

We evaluate our product's effectiveness in reducing sound transmission to enhance acoustic insulation, improving privacy and comfort.

Expertly Crafted Kits, Delivered with Precision

At Uniframe, we're committed to helping you achieve **consistent, high-quality windows** with our **easy-to-assemble DIY kits.** We handle the machining of essential components at our factory and then send you **partially assembled kits.** Our **extensive network of skilled fabricators** can complete the assembly with ease, guided by our clear and supportive instructions.

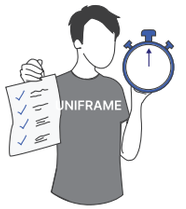

This approach eliminates the need for **expensive machinery at each site, ensures high standards of quality,** and **reduces overall costs.** We're here to make your **installation process smooth and efficient**, backed by our trusted network of quality fabricators.

Why Prominance?

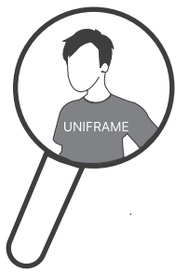

Pan-India Connected:

No matter where you are in the country, we're just a call away with our pan-India call center ready to assist you.

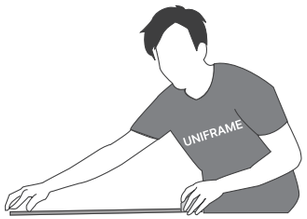

21 Days Challenge:

From customization to delivery, we make sure to handover fast and precise works within 21 days.

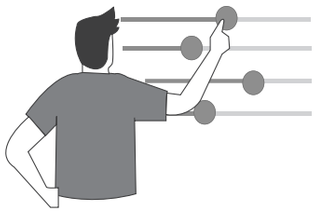

Selection of the best materials:

We select the world's one of the best raw materials to deliver the best results for you.

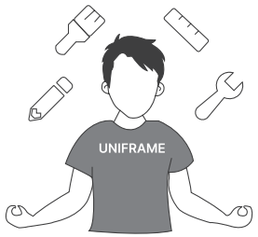

530+ fabricators connected:

Unlock endless possibilities with connections to 530 amazing fabricators!

Freedom of Customization:

We offer you a range of customization options, from color selections to styles, textures, and add-ons.

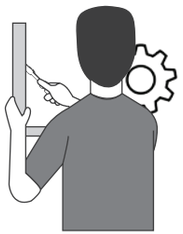

In-House Expertise:

At Uniframe, our top-notch in-house design and development team is here to assist you.

One Stop Solution:

We are your comprehensive solution for all your needs, providing everything you require in one place.

Beyond Installation:

Our journey doesn't end at installation—our excellent post-services are always just a call away.
